Summary

Python Full Stack Developer with experience building scalable applications using Python, FastAPI, React.js, PostgreSQL and REST APIs. Skilled in AI-powered development, LLMs, NLP, OCR, JWT Authentication and SQLAlchemy with a strong foundation in Data Structures, OOP, Agile Scrum and SDLC.

Technical Skills

Languages: Python, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT Authentication, SQLAlchemy

AI/ML: LLMs, Prompt Engineering, NLP, OCR (Tesseract), Sentence Transformers, Semantic Search, ATS Scoring

Databases: PostgreSQL, MySQL

Tools & Cloud: Git, GitHub, Docker, Postman, Swagger, Jira, GitHub Actions, AWS (Basics), Vercel, Render, Supabase

Experience

Software Engineer – Encatch Tech Services, Hyderabad

June 2025 – Present

- Developed reusable React.js components for enterprise web applications and integrated REST APIs.
- Collaborated with backend developers, UI/UX designers and QA teams following Agile Scrum methodology.
- Worked with Git, SDLC practices, debugging, testing and production issue resolution.
- Contributed to DineEase and Academy Flow projects, improving application stability and maintainability.

Projects

ResumeShort AI – AI Resume Screening Platform (FastAPI + React + AI + Grok LLM)

🐙 GitHub

- Built a multi-tenant AI-powered resume screening platform using FastAPI, React.js, PostgreSQL, JWT Authentication and REST APIs.
- Integrated Grok AI LLM, Sentence Transformers and OCR (Tesseract) for resume parsing, semantic matching, ATS scoring and automated candidate shortlisting.

Resume AI – AI Resume Optimization Platform (FastAPI + AI)

🐙 GitHub

- Developed an AI-powered resume optimization platform using FastAPI, PostgreSQL and SQLAlchemy with secure JWT authentication and role-based access.
- Leveraged Grok AI LLM, Prompt Engineering and Sentence Transformers to optimize resumes based on job descriptions while improving ATS compatibility.

Diabetes Prediction System (Machine Learning + OCR)

🐙 GitHub

- Developed a diabetes prediction system using Random Forest, Flask and Python to analyze patient health data and predict diabetes risk.
- Integrated OCR (Tesseract) to automatically extract medical report data, reducing manual data entry and enabling end-to-end prediction workflows.

Full Stack E-Commerce Website

🎥 Live Demo

- Developed a full-stack e-commerce platform using React.js, Flask and PostgreSQL with responsive UI and REST API integration.
- Deployed the application using Vercel, Render and Supabase with Git-based CI/CD workflows for seamless deployment.

Education

Kakatiya Institute of Technology and Science, Warangal

B.Tech in Computer Science Engineering (IoT)

Nov 2021 – May 2025

Resonance IIT Junior College, Warangal

Intermediate (MPC)

Jun 2019 – Mar 2021

Certifications

AWS Cloud Practitioner Essentials • Databricks Fundamentals • HackerRank SQL • Deloitte Data Analytics (Forage)
